BR-001	The business needs a standardized method for hiring managers to submit new employee equipment requests.	EP-001 Request Intake	FT-001 Equipment Request Submission	As a hiring manager, I want to submit a standardized equipment request so IT receives complete information in a consistent format.	FR-001	The system shall provide an online request submission interface accessible to hiring managers.	TR-001	Request submission page hosted on the existing internal web platform with role-based access via SSO.	Done	TC-001	Verify a hiring manager can access the request submission page after login.	Pass	—
BR-001	The business needs a standardized method for hiring managers to submit new employee equipment requests.	EP-001 Request Intake	FT-001 Equipment Request Submission	As a hiring manager, I want to submit a standardized equipment request so IT receives complete information in a consistent format.	FR-001	The system shall provide an online request submission interface accessible to hiring managers.	TR-001	Request submission page hosted on the existing internal web platform with role-based access via SSO.	Done	TC-002	Verify a non-manager user cannot access the request submission page.	Pass	—
BR-002	The business needs equipment requests to include complete and consistent information at the time of submission.	EP-001 Request Intake	FT-002 Required Information Capture	As a hiring manager, I want required fields enforced so I do not accidentally submit incomplete information.	FR-002	The system shall require the following fields before submission: employee full name, start date, role, and work location.	TR-002	Client-side and server-side validation on required fields with inline error messaging.	In Testing	TC-003	Verify the request cannot be submitted when Employee Full Name is blank.	Pass	—
BR-002	The business needs equipment requests to include complete and consistent information at the time of submission.	EP-001 Request Intake	FT-002 Required Information Capture	As a hiring manager, I want required fields enforced so I do not accidentally submit incomplete information.	FR-002	The system shall require the following fields before submission: employee full name, start date, role, and work location.	TR-002	Client-side and server-side validation on required fields with inline error messaging.	In Testing	TC-004	Verify the request cannot be submitted when Start Date is blank.	Pass	—
BR-002	The business needs equipment requests to include complete and consistent information at the time of submission.	EP-001 Request Intake	FT-002 Required Information Capture	As a hiring manager, I want required fields enforced so I do not accidentally submit incomplete information.	FR-002	The system shall require the following fields before submission: employee full name, start date, role, and work location.	TR-002	Client-side and server-side validation on required fields with inline error messaging.	In Testing	TC-005	Verify the request cannot be submitted when Role is blank.	Fail	BUG-001
BR-003	The business needs to capture each new employee's work location (remote, hybrid, or in-office) to inform equipment preparation.	EP-001 Request Intake	FT-003 Work Location Capture	As a hiring manager, I want to specify whether the new hire is remote, hybrid, or in-office so IT can prepare the right equipment.	FR-003	The system shall require the manager to select a work location value of Remote, Hybrid, or In-Office before submission.	TR-003	Required dropdown field with three predefined values, validated server-side.	Done	TC-006	Verify all three work location values (Remote, Hybrid, In-Office) display and are selectable.	Pass	—

BR-003	The business needs to capture each new employee's work location (remote, hybrid, or in-office) to inform equipment preparation.	EP-001 Request Intake	FT-003 Work Location Capture	As a hiring manager, I want to specify whether the new hire is remote, hybrid, or in-office so IT can prepare the right equipment.	FR-003	The system shall require the manager to select a work location value of Remote, Hybrid, or In-Office before submission.	TR-003	Required dropdown field with three predefined values, validated server-side.	Done	TC-007	Verify the request cannot be submitted when no work location is selected.	Pass	—
BR-004	The business needs hiring managers to select equipment from a standardized catalog to promote consistency and simplify fulfillment.	EP-002 Equipment Catalog	FT-004 Standard Equipment Selection	As a hiring manager, I want to select equipment from a standard catalog so my request is easy to fulfill.	FR-004	The system shall display a predefined catalog of standard equipment (laptop, monitor, headset, keyboard, mouse, docking station, access badge) for selection.	TR-004	Static catalog managed via configuration table on the existing web platform.	Done	TC-008	Verify all seven standard equipment items appear in the catalog.	Pass	—
BR-004	The business needs hiring managers to select equipment from a standardized catalog to promote consistency and simplify fulfillment.	EP-002 Equipment Catalog	FT-004 Standard Equipment Selection	As a hiring manager, I want to select equipment from a standard catalog so my request is easy to fulfill.	FR-004	The system shall display a predefined catalog of standard equipment (laptop, monitor, headset, keyboard, mouse, docking station, access badge) for selection.	TR-004	Static catalog managed via configuration table on the existing web platform.	Done	TC-009	Verify a hiring manager can select multiple standard items in one request.	Pass	—
BR-005	The business needs a defined process for handling non-standard equipment requests, including a justification.	EP-002 Equipment Catalog	FT-005 Non-Standard Equipment Handling	As a hiring manager, I want to request non-standard equipment with a justification so exceptions can be reviewed.	FR-005	The system shall allow the manager to request non-standard equipment and shall require a justification text entry before submission.	TR-005	Conditional required justification field triggered when non-standard equipment is selected.	In Testing	TC-010	Verify selecting a non-standard item displays the justification field.	Pass	—
BR-005	The business needs a defined process for handling non-standard equipment requests, including a justification.	EP-002 Equipment Catalog	FT-005 Non-Standard Equipment Handling	As a hiring manager, I want to request non-standard equipment with a justification so exceptions can be reviewed.	FR-005	The system shall allow the manager to request non-standard equipment and shall require a justification text entry before submission.	TR-005	Conditional required justification field triggered when non-standard equipment is selected.	In Testing	TC-011	Verify the request cannot be submitted with a non-standard item but no justification.	Fail	BUG-002
BR-006	The business needs non-standard equipment requests to be reviewed and approved before fulfillment.	EP-003 Approvals	FT-006 Approval Workflow	As an approver, I want non-standard equipment requests routed to me automatically so I can approve them before fulfillment.	FR-006	The system shall automatically route requests containing non-standard equipment to the designated approver (department manager).	TR-006	Workflow rule triggered by non-standard flag; approver notified by system-generated email.	In Development	TC-012	Verify a request with non-standard equipment is routed to the department manager for approval.	Not Run	—
BR-006	The business needs non-standard equipment requests to be reviewed and approved before fulfillment.	EP-003 Approvals	FT-006 Approval Workflow	As an approver, I want non-standard equipment requests routed to me automatically so I can approve them before fulfillment.	FR-006	The system shall automatically route requests containing non-standard equipment to the designated approver (department manager).	TR-006	Workflow rule triggered by non-standard flag; approver notified by system-generated email.	In Development	TC-013	Verify the approver can approve or reject the non-standard request.	Not Run	—

BR-007	The business needs IT to have a centralized view of all open equipment requests.	EP-004 Fulfillment	FT-007 IT Request Dashboard	As an IT support user, I want to see all open equipment requests in one place so I can manage fulfillment efficiently.	FR-007	The system shall provide a centralized view of all open equipment requests accessible to IT support users.	TR-007	IT dashboard view with filtering by status, submitter, and start date.	Done	TC-014	Verify IT users can view all open requests on the dashboard.	Pass	—
BR-007	The business needs IT to have a centralized view of all open equipment requests.	EP-004 Fulfillment	FT-007 IT Request Dashboard	As an IT support user, I want to see all open equipment requests in one place so I can manage fulfillment efficiently.	FR-007	The system shall provide a centralized view of all open equipment requests accessible to IT support users.	TR-007	IT dashboard view with filtering by status, submitter, and start date.	Done	TC-015	Verify IT users can filter the dashboard by request status.	Pass	—
BR-008	The business needs IT to maintain and communicate current request status throughout the fulfillment lifecycle.	EP-004 Fulfillment	FT-008 Status Management	As an IT support user, I want to update request status so managers and stakeholders can see current progress.	FR-008	The system shall allow IT support users to update the status of any request.	TR-008	Status field with permission-controlled edit access and full audit history.	In Testing	TC-016	Verify IT can update a request's status from Submitted to In Progress.	Pass	—
BR-008	The business needs IT to maintain and communicate current request status throughout the fulfillment lifecycle.	EP-004 Fulfillment	FT-008 Status Management	As an IT support user, I want to update request status so managers and stakeholders can see current progress.	FR-008	The system shall allow IT support users to update the status of any request.	TR-008	Status field with permission-controlled edit access and full audit history.	In Testing	TC-017	Verify a non-IT user cannot update request status.	Fail	BUG-003
BR-009	The business needs hiring managers to independently view the status of their submitted requests without contacting IT.	EP-005 Visibility & Reporting	FT-009 Manager Request View	As a hiring manager, I want to view the status of my submitted requests so I do not need to email IT for updates.	FR-009	The system shall display all requests submitted by the logged-in manager with current status.	TR-009	My Requests view filtered by submitter ID and current status field.	Done	TC-018	Verify a hiring manager sees only their own submitted requests.	Pass	—
BR-009	The business needs hiring managers to independently view the status of their submitted requests without contacting IT.	EP-005 Visibility & Reporting	FT-009 Manager Request View	As a hiring manager, I want to view the status of my submitted requests so I do not need to email IT for updates.	FR-009	The system shall display all requests submitted by the logged-in manager with current status.	TR-009	My Requests view filtered by submitter ID and current status field.	Done	TC-019	Verify the displayed status matches the current status in the IT dashboard.	Pass	—
BR-010	The business needs equipment requests to be submitted with sufficient lead time to allow fulfillment before the employee's start date.	EP-001 Request Intake	FT-002 Required Information Capture	As a hiring manager, I want the system to enforce a five-business-day lead time so IT has enough time to fulfill.	FR-010	The system shall reject requests with a start date fewer than five business days from the submission date.	TR-010	Business-day calculation logic applied against submission timestamp with validation error on submit.	In Testing	TC-020	Verify a request with a start date four business days away is rejected.	Pass	—

BR-010	The business needs equipment requests to be submitted with sufficient lead time to allow fulfillment before the employee's start date.	EP-001 Request Intake	FT-002 Required Information Capture	As a hiring manager, I want the system to enforce a five-business-day lead time so IT has enough time to fulfill.	FR-010	The system shall reject requests with a start date fewer than five business days from the submission date.	TR-010	Business-day calculation logic applied against submission timestamp with validation error on submit.	In Testing	TC-021	Verify a request with a start date exactly five business days away is accepted.	Blocked	—
BR-011	The business needs to identify and route requests that require procurement action when inventory is unavailable.	EP-004 Fulfillment	FT-010 Procurement Routing	As an IT support user, I want to flag requests requiring procurement so items can be ordered promptly.	FR-011	The system shall allow IT to mark a request as requiring procurement and shall update the status to Waiting on Procurement.	TR-011	Procurement flag on request record with automatic status transition and view filter for procurement team.	In Development	TC-022	Verify IT can flag a request as requiring procurement.	Not Run	—
BR-011	The business needs to identify and route requests that require procurement action when inventory is unavailable.	EP-004 Fulfillment	FT-010 Procurement Routing	As an IT support user, I want to flag requests requiring procurement so items can be ordered promptly.	FR-011	The system shall allow IT to mark a request as requiring procurement and shall update the status to Waiting on Procurement.	TR-011	Procurement flag on request record with automatic status transition and view filter for procurement team.	In Development	TC-023	Verify a flagged request appears in the procurement team's filtered view.	Not Run	—
BR-012	The business needs leadership to have visibility into request volume and fulfillment timeliness through basic reporting.	EP-005 Visibility & Reporting	FT-011 Leadership Reporting	As a department leader, I want to see request volume and fulfillment metrics so I can monitor process performance.	FR-012	The system shall provide a reporting view showing total request count, request count by status, and average fulfillment time.	TR-012	Reporting dashboard aggregating request data with three predefined metrics and date-range filter.	In Development	TC-024	Verify the reporting view displays total request count for a selected date range.	Not Run	—
BR-012	The business needs leadership to have visibility into request volume and fulfillment timeliness through basic reporting.	EP-005 Visibility & Reporting	FT-011 Leadership Reporting	As a department leader, I want to see request volume and fulfillment metrics so I can monitor process performance.	FR-012	The system shall provide a reporting view showing total request count, request count by status, and average fulfillment time.	TR-012	Reporting dashboard aggregating request data with three predefined metrics and date-range filter.	In Development	TC-025	Verify the reporting view calculates average fulfillment time correctly.	Fail	BUG-004
BR-013	The business needs a consistent set of request statuses to support tracking and reporting across the fulfillment lifecycle.	EP-004 Fulfillment	FT-008 Status Management	As an IT support user, I want a defined set of statuses so I can consistently track requests through their lifecycle.	FR-013	The system shall support the following request statuses: Submitted, Needs More Information, Pending Approval, Approved, In Progress, Waiting on Procurement, Ready for Pickup/Shipment, Completed, Cancelled.	TR-013	Status field configured as a predefined list of nine values with permitted transitions defined in a state machine.	In Testing	TC-026	Verify all nine defined statuses are available in the status dropdown.	Pass	—
BR-013	The business needs a consistent set of request statuses to support tracking and reporting across the fulfillment lifecycle.	EP-004 Fulfillment	FT-008 Status Management	As an IT support user, I want a defined set of statuses so I can consistently track requests through their lifecycle.	FR-013	The system shall support the following request statuses: Submitted, Needs More Information, Pending Approval, Approved, In Progress, Waiting on Procurement, Ready for Pickup/Shipment, Completed, Cancelled.	TR-013	Status field configured as a predefined list of nine values with permitted transitions defined in a state machine.	In Testing	TC-027	Verify only IT users can set a request to Cancelled and a cancellation reason is required.	Fail	BUG-00
